What are the risks of investing?

Risk indicator for the Australian Growth Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at ipq.fisherfunds.co.nz/ffmf.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the [product disclosure statement \(PDS\)](#) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	1.31%	-11.64%
Annual return (after deductions for charges but before tax)	1.28%	-12.75%
Market index annual return (reflects no deduction for charges and tax)	9.55%	13.93%

For the period covered by this fund update the market index is the S&P/ASX 200 Accumulation Index 70% hedged into NZD. Additional information about the market index is available on the offer register at disclose-register.companiesoffice.govt.nz under Fisher Funds Managed Funds or OFR10667.

Annual return graph

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 31 March 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.

What fees are investors charged?

Investors in the Australian Growth Fund are charged fund charges that include GST. In the year to 31 March 2025 these were:

	% of net asset value
Total fund charges	0.87%
Which are made up of:	
Total management and administration charges	1.45%
Including:	
Manager's basic fee	1.27%
Other management and administration charges	0.18%
Total performance-based fees²	-0.58%

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Katie had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Katie incurred a loss after fund charges were deducted of -\$1,164 (that is -11.64% of her initial \$10,000). Katie did not pay other charges. This gives Katie a total loss after tax of -\$1,164 for the year.

Notes

- ¹ Number of accounts held by investors in the fund.
- ² The negative performance-based fee as at 31 March 2025 is a result of the actual performance fee charged to the fund at 30 June 2024 being lower than the fee accrued to 31 March 2024. Because the performance fee period runs from 1 July to 30 June each year and the calculation period for fees disclosed in the fund update runs from 1 April to 31 March each year, the actual amount payable at the end of the current performance period may be greater or less than the performance fees accrued at 31 March and a negative performance fee expense at 31 March is possible. The performance-based fee accrual is calculated on a daily basis. See the product disclosure statement for more information about the basis on which performance fees are charged.
