What are the risks of investing?

Risk indicator for the Balanced Fund¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the [product disclosure statement \(PDS\)](#) for more information about the risks associated with investing in this fund.

Notes

1. Market index returns as well as the fund's actual returns have been used to fill in the risk indicator, as this fund has not been in operation for five years. Market index returns have been used from 1 January 2021 to 30 September 2025. As a result of those returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. An estimate has been used to calculate other management and administration charges based on a combination of forecast expenses expected to be charged to the fund and historic expenses charged to the underlying funds into which the fund invests.
