Fisher Funds KiwiSaver Plan Investment Update

GlidePath Age 55

For the quarter ended: 30 September 2026
This investment update was first made publicly available on: 29 October 2026.

What is the purpose of this update?

This document tells you how GlidePath Age 55 has performed and what fees were charged. The document will help you to compare the investment option with other funds. Fisher Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this investment option

GlidePath Age 55 is a representation of the GlidePath life cycle. This investment option invests 11% in the Growth Fund and 89% in the Balanced Fund.

Total value of the investment option	$15,809,332
Number of investors in the investment option	236
The date the investment option started	26 March 2025

What are the risks of investing?

Risk indicator for GlidePath Age 55[1]:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the investment option's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future investment updates.

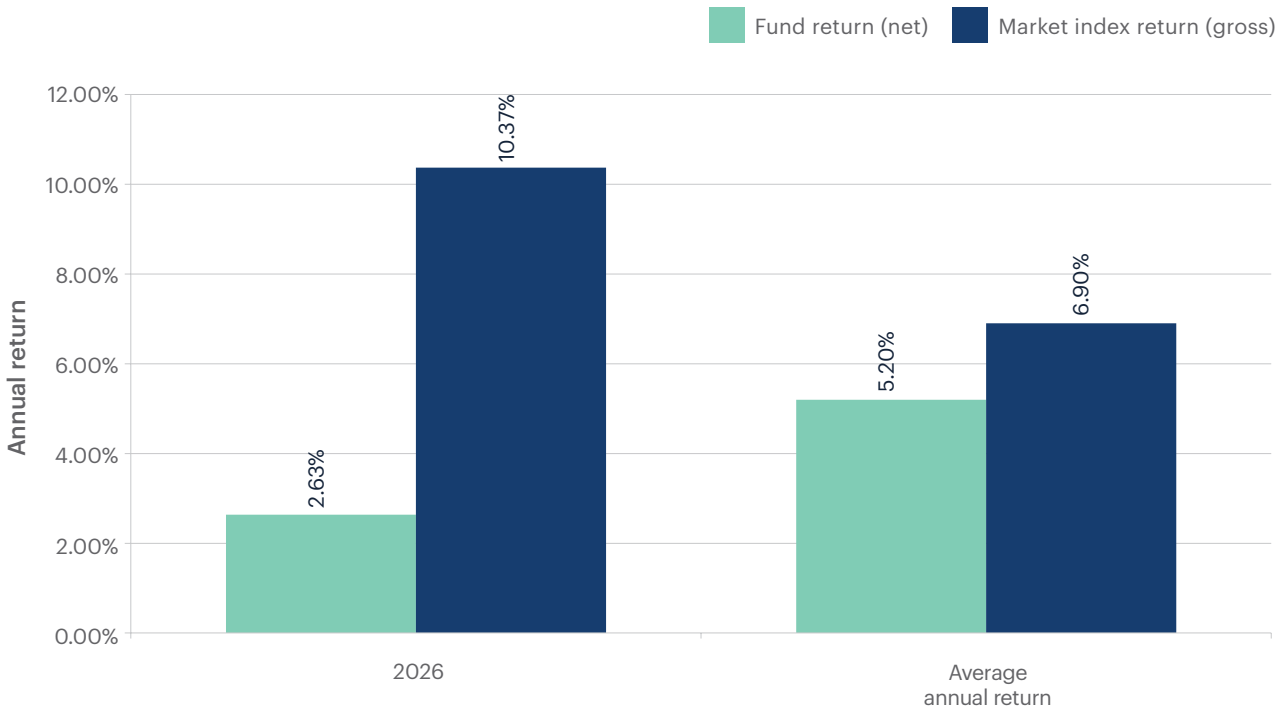
See the product disclosure statement (PDS) for more information about the risks associated with investing in this investment option.

How has the investment option performed?

	Past year
Annual return (after deductions for charges and tax)	2.76%
Annual return (after deductions for charges but before tax)	3.47%
Market index annual return (reflects no deduction for charges and tax)	7.14%

The market index is made up of 11% of the Growth Fund market index and 89% of the Balanced Fund market index. Additional information about the market index is available on the offer register at disclose-register.companiesoffice.govt.nz under Fisher Funds KiwiSaver Plan or OFR10715.

Annual return graph



This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.

What fees are investors charged?

Investors in GlidePath Age 55 are charged fund charges. Based on the PDS dated 30 September 2025, these are expected to be:

	% of net asset value
Total fund charges (estimate)[2]	1.13%
Which are made up of:	
Total management and administration charges (estimate)[2]	1.13%
Including:	
Manager's basic fee	0.92%
Other management and administration charges (estimate)[2]	0.21%

There is no extra charge for GlidePath. The annual fund charges for the underlying fund(s) apply.

In the year to 31 March 2027 we expect the total fund charges to be 1.02%. This is the result of a reasonable estimate of the future other management and administration charges costs based on:

- a combination of forecast expenses and historic expenses charged both to the funds and the underlying funds invested into; and
- expected growth in the net asset value of the funds over time.

The Manager's basic fee is disclosed on a before tax basis. GST has been added to the other management and administration charges (estimate) where applicable.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Alice had $10,000 in the investment option at the start of the year and did not make any further contributions. At the end of the year, Alice received a return after fund charges were deducted of $276 (that is 2.76% of her initial $10,000). This gives Alice a total return after tax of $276 for the year.

What does the investment option invest in?

Further information

You can also obtain this information, the PDS for the Fisher Funds KiwiSaver Plan, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz under Fisher Funds KiwiSaver Plan or OFR10715.

Notes

1. The GlidePath Age 55 risk indicator has been calculated using the return of the funds referenced for the age group, and its target fund allocation.
2. The annual fund charges for the GlidePath ages are estimated based on the annual fund charges for the Plan fund(s) as at the stated age. The annual fund charges will vary based on the performance of the Plan fund(s) and the proportion invested in each between GlidePath ages.
