Risk indicator for GlidePath Age 55:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the investment option's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at ipq.fisherfunds.co.nz/fftwo.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future investment updates.

* In the year to 31 March 2026 we expect the total fund charges to be 1.02% as a result of an increase in Other management and administration charges. This is due to an increased exposure to private equity assets.

Small differences in fees and charges can have a big impact on your investment over the long term.
